

## Description

This *Allium* species grows in a circular clump that expands as plants age. The curly leaves form a wonderful spiral effect. It is a slower-growing plant that will take a couple of years to develop on a green roof; very much worth the wait. The flowers are lower and larger than other *Alliums* and make a nice contrast against the slightly bluish-green foliage. Flowers attract butterflies, bees, and other pollinators. Foliage remains throughout most of the winter months, but, is not as lush in autumn as in the spring and summer. Brown seed heads can remain upright throughout the coldest temperatures of winter.

Sold as bare root bulbs. Available in plugs as a custom order. Please contact the office for lead times.

## Profile

- **Botanical Name:** *Allium senescens* ssp. *montanum* var. *glaucum*
- **Family:** Alliaceae
- **Plant Type:** Hardy Perennial
- **Plant Usage:** Accent
- **Hardiness Zone:** 4
- **Foliage Color:** Blue-Green
- **Flower Color:** Pink
- **Bloom Time:** Late Spring
- **Winter Interest:** Blue-Green Foliage
- **Height:** 6"
- **Spread:** 6"
- **Light Requirement:** Full Sun to Partial Shade
- **Origin:** Europe
- **Self Sowing:** A little
- **Shade Tolerant:** Yes
- **Substitutes:** [Allium schoenoprasum](#), [Armeria maritima 'Splendens'](#)
