

Description

Campanula rotundifolia is a widespread American wildflower that ranges from Canada to the Gulf of Mexico. Because of its wide distribution, it is a food source for many insects. It has an early summer bloom of pale lavender-blue, bell-shaped flowers. This perennial will benefit from growing in a deeper soil profile, or in mounded green roof media, and may need some watering to survive on a roof, in most areas. We recommend planning for regular maintenance when using this plant on green roofs.

Large quantities may require custom growing. Please contact office for lead times.

Profile

- **Botanical Name:** Campanula rotundifolia
- **Family:** Campanulaceae
- **Plant Type:** Hardy Perennial
- **Plant Usage:** Accent
- **Hardiness Zone:** 3
- **Foliage Color:** Green
- **Flower Color:** Lavender Blue
- **Bloom Time:** Early Summer
- **Winter Interest:** Green Foliage
- **Height:** 12"
- **Spread:** 8"
- **Light Requirement:** Full Sun to Partial Shade
- **Origin:** Europe and North Africa
- **Self Sowing:** No
- **Shade Tolerant:** Partial
- **Substitutes:** [Penstemon hirsutus var. pygmeus](#), [Aster alpinus](#),
