

Description

This species is an excellent choice for attracting hummingbirds. Native to the Western US, this drought tolerant plant flowers in early summer. Flowers are a brilliant scarlet-red. Foliage grows in basal rosettes featuring green, lance-shaped leaves. Like most perennials used on green roofs, this plant will benefit from growing in a deeper soil profile, or where the green roof media has been mounded. It will need regular water to become established on the roof.

Please contact the office for lead times on larger orders.

Profile

- **Botanical Name:** Penstemon barbatus ssp. coccineus
- **Family:** Scrophulariaceae
- **Plant Type:** Hardy Perennial
- **Plant Usage:** Accent
- **Hardiness Zone:** 5
- **Foliage Color:** Green
- **Flower Color:** Red
- **Bloom Time:** Early Summer to Autumn
- **Winter Interest:** Green Foliage
- **Height:** 18"
- **Spread:** 6"
- **Light Requirement:** Full Sun
- **Origin:** Western US, Mexico
- **Self Sowing:** Yes
- **Shade Tolerant:** No
- **Substitutes:** [Penstemon hirsutus var. pygmeus](#), [Ipomopsis rubra](#),
