

Description

A tall Mid-Atlantic Native grass with blue-green foliage that turns red in fall and winter. Looks beautiful when in seed when back-lit by sunlight. Caution should be used as it will self-seed into other areas of a roof and can look weedy if not maintained.

Profile

- **Botanical Name:** Schizachyrium scoparium syn. Andropogon scoparius
- **Family:** Poaceae
- **Plant Type:** Grass
- **Plant Usage:** Accent
- **Hardiness Zone:** 3-9
- **Foliage Color:** Blue-Green
- **Flower Color:** Blue-Green
- **Bloom Time:** Late Summer
- **Winter Interest:** Red-Brown Dried Foliage
- **Height:** 36"
- **Spread:** 24"
- **Light Requirement:** Full Sun
- **Origin:** North America
- **Self Sowing:** Yes, can be aggressive.
- **Shade Tolerant:** No
- **Substitutes:** [Sesleria caerulea](#),
