Description

The cultivar name means “Little Evergreen” in German. This is a robust, beautiful plant with green to reddish foliage with a profusion of bright gold, pollinator-attracting flowers in the summer. In autumn, the leaves turn bright red-orange with lime and yellow tones, creating one of the best cold-weather displays, with foliage persisting through the winter. A very adaptable plant, this species spreads quickly to create a mat, but is somewhat slower-growing than the similar Sedum kamtschaticum. ‘ImmergrUNCHEN’ will also tolerate some shade, making it a very versatile green roof plant.

Profile

- **Botanical Name:** Sedum hybridum ‘ImmergrUNCHEN’
- **Family:** Crassulaceae
- **Plant Type:** Hardy Succulent
- **Plant Usage:** Ground Cover
- **Hardiness Zone:** 4
- **Foliage Color:** Green
- **Flower Color:** Yellow
- **Bloom Time:** Mid to Late Summer
- **Winter Interest:** Orange-Red Foliage
- **Height:** 4"
- **Spread:** 8"
- **Light Requirement:** Full Sun to Partial Shade
- **Origin:** Siberia and Mongolia
- **Self Sowing:** No
- **Shade Tolerant:** Partial
- **Substitutes:** Sedum kamtsch. var. flor. ‘Weihenstephaner Gold’, Sedum middendorffianum var. diffusum,
