Description

Often referred to as “the white-flowering spurium”, Sedum spurium ‘Album Superbum’ features a good spreading habit, beautiful green foliage, and clusters of star-shaped white flowers. Like all spurium, leaves drop in autumn but sets rosettes at the base of each stem that persists through the winter. Flowers bloom mid to late summer into autumn, providing great late-season interest.

This variety does not tolerate the summer heat and humidity as well as other cultivars, and may go into dormancy to re-emerge in fall. It will tolerate a good amount of shade, although this may affect flowering.

Sedum spurium ‘Album Superbum’ Spec Sheet

Profile

- **Botanical Name:** Sedum spurium 'Album Superbum' syn. 'White Form'
- **Family:** Crassulaceae
- **Plant Type:** Hardy Succulent
- **Plant Usage:** Ground Cover
- **Hardiness Zone:** 4
- **Foliage Color:** Green
- **Flower Color:** White
- **Bloom Time:** Midsummer to Autumn
- **Winter Interest:** Bronze Rosette Foliage
- **Height:** 4"
- **Spread:** 8"
- **Light Requirement:** Full Sun to Partial Shade
- **Origin:** Caucasus Range to Armenia and North Iran
- **Self Sowing:** No
- **Shade Tolerant:** Partial
- **Substitutes:** Sedum spurium ‘John Creech’, Sedum spurium ‘Summer Glory’, Sedum spurium ‘Roseum’,
