Emory Knoll Farms

Campanula rotundifolia

Campanula rotundifolia is a widespread American wildflower that ranges from Canada to the Gulf of Mexico. Because of its wide distribution, it is a food source for many insects. It has an early summer bloom of pale lavender blue, bell-shaped flowers. It may perish in periods of drought but produces viable seed; it will not become a pest and is worth replanting if necessary. This perennial will benefit from a deeper soil profile or mounded green roof media, and will need regular watering to survive on a roof in most areas. We recommend planning for regular maintenance when using this plant on green roofs.

CHARACTERISTICS

Foliage Color: Green

Flower Color: Pale lavender blue

Bloom Time: Early summer

Winter Interest: Some green

BOTANICAL INFORMATION

Place of Origin: North America

Hardiness Zone: 3

Height: 12” Spread: 8”

Self-sowing: Yes

Light Requirement: Full sun – Partial shade

Plant Use: Accent

PLANT SIZE

Deep nursery plug
3” deep x 1.5” across at the top

PLANT SPACING

Typically planted at 2-3 plugs per square foot

PLANTING MEDIUM

Green Roof Growing Medium
6” Min. Depth
