Emory Knoll Farms

Sedum spurium 'Fuldaglut'

Sedum spurium 'Fuldaglut' is one of several tough, hardy, red-leaved spuriums that we carry. Any of these red spuriums can be called by the common name 'Dragon's Blood', but this name encompasses several distinct cultivars. All spuriums we grow have exceptional drought tolerance, hardiness in heat and cold, dense foliage, and reliable flowers that attract butterflies, bees, and other pollinators. 'Fuldaglut' has a nice low habit, produces bright, light pink flowers in mid- to late Summer, and sets gorgeous dark red rosettes in winter. Leaves turn greener in summer, but retain their dark red color around the edges. Foliage may take on pink tones in the fall. This plant will tolerate some shade, although flowering and leaf color may be affected. The stunning red foliage makes for a very nice color contrast when mixed with other plants.

CHARACTERISTICS

Foliage Color: Green to red

Flower Color: Pink

Bloom Time: Midsummer to late summer

Winter Interest: Striking red foliage in fall and winter,
Red rosettes in winter

BOTANICAL INFORMATION

Place of Origin: Caucasus range to Armenia and Northern Iran

Hardiness Zone: 5

Height: 6” Spread: 8” per year

Self-sowing: No

Light Requirement: Full sun to partial shade
Note: amount of shade affects foliage color

Plant Use: Groundcover

PLANT SIZE

Deep nursery plug
3” deep x 1.5” across at the top

PLANT SPACING

Typically planted at 2-3 plugs per square foot

PLANTING MEDIUM

Green Roof Growing Medium
Depth: 4” Min.
